RESEARCH INTEREST(S)

Econometrics, with applications in macroeconomics and finance

ARTICLES

5. Optimal bandwidth selection for forecasting under parameter instability. (with B. Peng, S. Shi and W. Yao)
Journal of Financial Econometrics • forthcoming
 4. Local GMM estimation for nonparametric time-varying coefficient moment condition models.
Journal of Time Series Analysis • forthcoming
 3. Mean group instrumental variable estimation of time-varying large heterogeneous panels with endogenous regressors. (with M. Marcellino and G. Kapetanios)
Econometrics and Statistics • 37, 26–41, 2026
 2. Macroeconomic Forecasting in a Multi-country Context. (with A. Carriero, T. E. Clark and M. Marcellino)
Journal of Applied Econometrics • 37(6), 1230–1255, 2022
 1. A Monte Carlo comparison of GMM and QMLE estimators for short dynamic panel data models with spatial errors. (with S. Zhou and Z. Fan)
Journal of Statistical Computation and Simulation • 88(2), 376–409, 2018
-

WORKING PAPER(S)

2. Series Estimation of Cointegrated System with Time Varying Coefficients. (with J. Gao and H. Kew)
 1. Estimating smooth structural change in cointegrated system with local-to-unity regressors. (with H. Kew)
-

WORK IN PROGRESS

1. Limit theory for kernel-based estimation in time-varying cointegrated system with moderately integrated and moderately explosive regressors.
